Art Unit: 3634

1. Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not understood how claim 39 can properly depend from claim 37. Claim 37 recites that the "desired tab location may be changed without separating the tab from said hanging file system", and claim 39 recites that the "tab forms an integral part of said file supporting pocket, and is folded upwardly to dispose it in said extended orientation". It is not understood how the tab of claim 39 can change location, as recited in claim 37.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 37, 38, 40, and 42 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wyant '685.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 39, and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snowden in view of Smith '881 and Snider et al. '328.

It would have been obvious to modify the folder and tab of Snowden '057 by making it foldable as taught by Smith '881, so that it may be hidden from view. It would further have been obvious to make the tab "integral" with the folder as taught by Snider et al. '328, for simplicity of construction.

6. Claims 30, 31, and 34-36 are allowed.

7. The patents to Churnick, Weber et al., Epstein et al., and Aaldenberg et al. are cited to show similar structures.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS**

ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
